Primes Wood & MDF and Sands to Powder in 20 Minutes

1720 Rich Wood PRO Waterborne Lacquer Undercoater

- Fast Drying
- Easy Sanding
- Waterborne Formula
- Ready-to-Spray
- Resists Tannin Bleed
- HAPS Free
- Interior / Exterior Use
- Topcoat with Water or Solvent

Rich Wood PRO Waterborne Lacquer Undercoater is a fast drying, easy sanding waterborne white primer.

It is designed to help prevent tannin stain migration and prevent bleed-through while also creating an ideal smooth basecoat for waterborne or solvent borne pigmented topcoats.

Formulated for use in all general wood finishing, including: kitchen and bathroom

cabinetry, fine furniture, interior woodwork and architectural millwork.

Use on unfinished MDF, softwoods such as pine and cedar, and hard woods such as oak, poplar, birch and maple.

May also be used to prime exterior wood furniture, window components, shutters, trim and doors.
